PROFILE

QA Automation Engineer with 4+ years of experience building reliable UI and API test automation, parallel CI workflows, and AI-assisted QA tools. Hands-on with Playwright, Cypress, TypeScript, SQL, Jenkins and GitHub Actions. Based in Lahore; open to remote roles and relocation with visa sponsorship. One-month notice period.

SELECTED IMPACT

- Cut Jenkins full-regression runtime from 3–4 hours to about 30 minutes by splitting work into independent parallel groups.
- Expanded a regression suite from 3,000 to about 7,000 tests while reducing automated failures from 400+ to about 80.
- Reduced regression recovery from 1–1.5 days to about 4–5 hours with targeted reruns and database restoration.
- Helped migrate a Cypress suite to Playwright in six days using a guarded agent and assertion-level mutation checks.
- Contributed to a 14-agent QA suite associated with capacity rising from 1–2 to 3–6 tickets per QA engineer per sprint.
